Less than zero – impossible!

Dear Business Partners,

Spülboy® doesn't simply think – Spülboy® thinks ahead!

Spülboy® always acts in the interest of its clients and their request to guarantee perfect hygiene and a hundred percent cleanliness.

To not only keep our high quality standard, but also extend it continuously, we are focusing especially on the innovative development of our products and services.

Spülboy® took up the challenge!

And ordered a series of tests at the renowned Fraunhofer Institute. The Fraunhofer Institute for biomedical technique was testing the antimicrobe effect of Spülboy® on the surface of glasses. The series of experiments included three runs, with five glasses each, using original Spülboy® glass washing tablets.

The result: while cleaning with cold water, even often discovered germs like Escherichia coli or the especially resistant Pseudomonas aeruginosa had no chance!

All glasses were absolutely germ free!

That is the Security, which only the Original can guarantee you. Another great reason to trust the excellent hygiene the products of Europe's leading brand in the field of glass cleaning systems give you.

Do you have questions concerning the series of tests or would you like to get more detailed information about Spülboy®? Just call us or send us an email!

Your Spülboy® team.
